

# autopaint

The Paint code of your car is printed on the Manufacturer's / Compliance / Identification Plate (approx. size of a Credit Card) somewhere on your car, normally it refers to "Ext. Colour" / "Paint" on this plate or sticker. The Diagram below shows where you can expect to find this plate containing the Paint Code. We use this code to make a colour that will match your car's original colour.

(As models changed over the years, manufacturers have often moved the location of the Identification Plates & labels, hence the reason for more than one possible location.)

## LIST OF VEHICLES:

Audi	15
