

### Natural Colours

This range of colours are the most popular hues and fit fabulously with modern furnishings and the latest in decorating choices. Many of the colours are also available in double, half and quarter tints, as shown on the right of each swatch. Actual colours may vary from that displayed on your screen, due to differences in screen settings and quality.

### Roof / Cladding Colours

This range of colours have been chosen to complement our natural colours as well as standard roof and cladding manufacturer's colours. Actual colours may vary from that displayed on your screen, due to differences in screen settings and quality.

### Scenic Colours

These paints have been specially formulated for the film and theatre industries, with input from experts in the field. All of our colours in this range are super-saturated with pigment. They can be used straight from the pot for intense effects, reduced with white to produce undertones, inter-mixed with other colours from the range to cover the full spectrum of colour or diluted with water to create washes. Actual colours may vary from that displayed on your screen, due to differences in screen settings and quality.

### Specialest Screen Colours

We also manufacture specialist screen colours for the film industry, that provide the high luminance values and colour saturation for keying effects. Actual colours may vary from that displayed on your screen, due to differences in screen settings and quality.
